DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification makes no reference to the term "computer readable media", which appears in claims 63-74. Applicant must amend the specification to provide clear support of antecedent basis for the term, taking care to ensure that no new matter is introduced, or amend the claim to use terminology consistent with the specification.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-74 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-74 of prior U.S. Patent No. 6,708,205. Claims 1-74 of the present application are identical to claims 1-74 of U.S. Patent No. 6,708,205. This is a double patenting rejection.

Art Unit: 2153

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 2, 7-14, 25, 31, 32, 35, 51, 63, 64, 67-69, 71 and 74 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 4, 8, 10, 21, 33-40 and 54 of copending Application No. 10/770,108. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variations of each other.

The claims of the present application are directed toward implementing e-mail messaging for a single root e-mail address, including creating a directory for storing a suffix e-mail address. The claims of copending Application No. 10/770,108 are directed to implementing e-mail messaging for a *plurality* of root e-mail addresses, including associating a suffix e-mail address with an existing directory. One of ordinary skill in the art would have recognized that an invention for implementing e-mail messaging for a

Art Unit: 2153

single e-mail address could have been easily modified to implement messaging for multiple e-mail addresses. Similarly, one of ordinary skill in the art would have recognized that an invention for implementing e-mail messaging for a multiple e-mail addresses could be modified to support only a single e-mail address.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
